High Quality & Technology For **CONIC** The Future

CONIC

SINCE 1976

Traditional technology and spirit is still alive in our newest punch press tools

Conic has been produced quality punch press tools since 1976 in Okayama Japan.

Our tools are used worldwide in the sheetmetal market and that quality is really satisfied from various production customers.

Our policy is that we make a high quality tools in timely, in reasonable price to helping customers manufacture sheet metal parts in high productivity and reliability.

We have done a lot of development of new products such as Super Dry Punch(SDP), Conic Hard Punch(CHP) for last long tools.

We recently introduced PROTECH series tool to the market and market reflect strong praise.

Conic would like to be your punch press tool partner.

We look forward to serving you.

Punch Press tools

Conic supplies following tools

- Amada Thick turret type
- Amada Thin turret type
- Murata Wiedmann (114, Vulcan)
- Trumpf type
- Nisshinbo type
- Salvagnini type (new S4 type)
- Press Brake

Conic Original Tools

Perfect for stainless steel,
 Best fit for recent non-lubrication
 clean type punching.

Super Dry Punch

This is our best tool. This tool is suitable for night time unattended operation and dry (no oil lubrication on the sheet metal) condition punching. Punching tool edge has very strong electrical process which is not like a coating, tool edge hardness are from HV2500 to HV3000 not only surface but internal metal structure also. This tool shows long lasting performance especially for high tensile steel and stainless steel.

Ultra cost performance tool for
 reasonable price

Conic Hard Punch

Conic Hard Punch are good cost performance tools. This tooling has special treatment process on the M2 steel punch tip, which is not coating. Surface of the tool tip are very smooth, so that, good for anti galling that is material buildup adheres on the sides of the punch tip application such as aluminum punching.

Punch Press tools

PROTECH
Series

Tool handling evolution

PROTECH Series

Conic offers new tool series, PROTECH series tools are totally hand tool free punch press tools. It is not necessary any hand tools, when set the punch height adjustment or disassemble the punch body.

1. Just 3 cricks for height adjustment

When adjust the punch height, set the punch body bottom surface to stripper plate, and make just 3 crick to correct punch height. It is not necessary hand tools or even caliper.

Such a quick adjustment makes good cost down to customer production.

Other tool maker
It need hand tools such as hex wrench

2. High speed processing tools

Conic PROTECH series tool is using spring canister unit, therefore after grinding punch body, total punch unit height does not change. This tool is perfect for electric motor punch press machine high speed mode.

3. Max.punch grinding amount is 5mm

5mm grinding amount, it is more than double tool life to compare with standard tools.

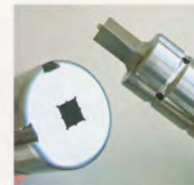

Standard tools
2mm max. grinding

Protech series can be grinding 5mm max.

*Narrow type is not adapted

4. Oil Mist Punch (Air blow) as standard

Adapt Air Blow capable Oil Mist punch as standard. Round punch need Protech appropriation.

High-quality products through fast and efficient technology

In order to supply tools faster, higher quality, and better price, Conic is trying to do our best in the sheet metal market. This effort comes to a real appreciation in the Japanese sheet metal market, then now Conic offers the most comprehensive series of punching tools design to accommodate at any punching machine applications all over the world. Especially our standardized forming tool and special shape tools are highly evaluated with performance and flexibility.

Conic Special Tools

Widest variety special forming and special shape tools in advanced technology

Conic Special tools

Conic offers the best performance special tools to the customer. Conic engineers always try to find the best solution of productive tools to the customer which uses the most advanced tooling technologies. Please contact our knowledgeable tool sales desk staff for details.

CONIC High Performance Toolings

High Quality Assurance System

ISO 9001 :2008 provide superior Quality Management System In 1998 Conic Corp, received ISO9001 authorization, and it has been recognized as a very reliable company, both on the International front and Japan.

Tool Sales Desk

Professional response to the customer.

Not only function of taking the order, Conic sales desk staff responses questions, requests, and consultations from customer by using telephone, facsimile, e-mail in professional manners. Conic uses such important information for development of new tools and working technologies. Tool sales desk also supply Conic's web site as the technical support and engineering guide.

About Us

Quality

We supply high quality tools under management and certification of ISO9001:2008.
Registration of ISO9001:2008 JQA-2633 Conic Okayama Factory.

Policy

Three major policies "Advanced Delivery" "Best Quality" "Good Price" Conic tool is 100% inspected with high tech 3D checkers.

History

Conic has produced high quality tools since 1976.
Conic is targeting next step of tooling industries.

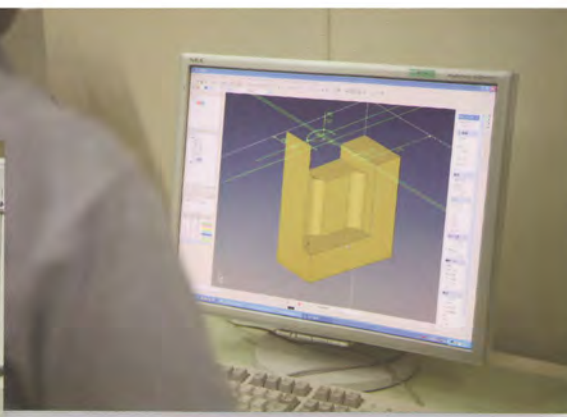

Customers

5,000 customers in domestic and foreign customers in China, Korea, Australia, New Zealand, Philippines, Singapore, Taiwan, Germany, USA, Brazil, Malaysia, Turkey, Estonia Etc.

Production

Using state of the art technology such as CNC wire profile EDM, CNC combination type machining center etc.

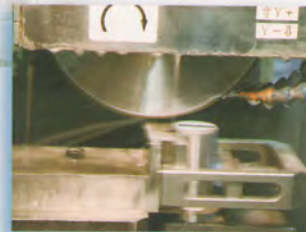

Conic Okayama factory

Since 1976 in the market, Conic is leading the independent manufacturing company of the punch press tools in the sheet metal market. Okayama factory is the core of such production center. The most advanced technology machine and computer system is used in the production area in order to supply customer's requirement in most innovative ways. Our customers always rely on our response and engineering performance. Conic is the largest independent punch press tool supplier in Japan.

Equipment of Conic Okayama Factory

Conic is using the most advanced machine systems for tooling production. Those machine systems are highly maintained to produce the most innovative tooling systems.

● Heat treatment equipment

● CNC machining center

● CNC wire EDM machine

● CNC jig borer

Machinery

We would like to combine the power of human and technology in the various forms for various purposes.

Conic supplies the best solution machine and support systems to the sheet metal business customers. The benefits of these activities are highly evaluated in the sheet metal market.

 **salvagnini**

A Tied up with Salvagnini

Salvagnini is the sheet metal FMS leader company in worldwide, Conic is strong partner of Salvagnini in Japan. Conic always look forward the future in order to find the trends in the sheet metal market. Having recognized this trend as a sign of rising demand of sheet metal FMS, Conic entered into marketing tie-up with Salvagnini since 1987.

MITSUBISHI laser

Production System

Conic is able to supply not only tools but also machine. Conic sales engineer always help customers requirement to prepare best solution in the market. The areas of our specialties are punch press, laser cutting system, CAD/CAM system, and other sheet metal related machineries.

UM Project

It means used machine project.

Conic is supplying good quality used machine to the customers. After get the machine from the original customer, Conic give the high quality maintenance and re-paint on the machine by qualified engineers before sales. Customer trust machine performance and conditions similar as when it is new.
